

Caves-del-Drach-Porto-Cristo-Mallorca

Located on Mallorca's east coast the caves are without doubt one of the island's most outstanding tourist attractions, extending for almost 2,400 metres and including internal heights of 25 metres above the cave floor. Hidden within the caves is Lake Martel, considered to be one of the largest subterranean lakes in the world, (177 metres long and 230 metres wide) on which there are daily performances of classical music featuring pieces by Caballero, Chopin, Offenbach, ... After the concert one can take a short boat trip on the lake. The unequalled beauty of the caves is further enhanced by the lightning planned and set in place by the engineer Carlos Buigas. Cave tours are in groups and take around one hour. The temperature inside is 20°C with humidity at 80%. The route is 1,200 metres long and up and down, in total, there are some 250 steps. Sensible footwear is recommended because in places the cave floor is wet. Pushchairs are not recommended. The live concert lasts 10 minutes and is played by a quartet of musicians. This is followed by a light show imitating the sunrise of the sun over the lake. Then there is an opportunity to take a short boat trip across the lake or to continue on foot across the bridge. Inside the caves filming and photography are prohibited as are animals, with the exception of guide dogs. You are asked to follow the instructions of the staff at all times.
